

OBJECTIONS  
SEVIER ADJUDICATION  
DETERMINATION  
MEMO IN RE: APPLICATION #367, WILLOW CREEK

---

At a meeting of the State Engineer with officers of this Company at Axtell, April 21, 1927, the matter of the objection filed by this Company, was discussed.

It was represented that the period of use allowed did not cover acutal conditions and it was claimed that water was used as early as March 1 and as late as November 1. The area given in the Proposed Determination was not that claimed but the difference was not sufficient to be controlling.

It was claimed that there was a typographical error in the capacity of the storage reservoir and the Engineer agreed to correct this.

It was understood that the object of Edwin T. Watts would be stipulated out of the way and also that a filing for the Michelsen right would be accepted by the State Engineer provided said filing set out under explanatory that the water claimed was newly developed water.

An examination on the ground indicates quite clearly that there had been no use of the water of Willow Creek as called for by certificate #188 of the Highland Canal Company. Later on it was indicated that the Highland Canal Company would hold a meeting and decide whether or not they were willing to withdraw the claim under this certificate which had been objected to by the Willow Creek Irrigation Company.
